Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-14, 19, drawn to a system with a clamped substrate, classified in class 137, subclass 884.
- II. Claims 15-18, drawn to a method of clamping a part, classified in class 403, subclass 374.1.
- III. Claims 20-25, drawn to a substrate with air passages, classified in class137, subclass 884.
- IV. Claims 26-32, drawn to a valve, classified in class 137, subclass 625.48.
- V. Claims 33-49, drawn to a method of making a seal surface, classified in class 29, subclass 890.14.

The inventions are distinct, each from the other because:

Inventions I, II, III, IV, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fox whose telephone number is 571-272-4912. The examiner can normally be reached on Increased Flextime.
